

Business Rules Context Kit License Agreement

1. Purpose and Scope The *Business Rules Context Kit* (“Context Kit”) consists of technical definitions, schemas, prompts, and descriptive materials intended to support Large Language Model (LLM) integrations with the *Business Rules* (“BR”) software environment.

2. Grant of License The Licensor, Application Development Systems, grants you (“Licensee”) a non-exclusive, royalty-free license to use, copy, and integrate the Context Kit for any purpose, including commercial use, research, and product development.

3. Relationship to the Business Rules License The Context Kit is provided solely as a descriptive and interoperability resource. Use of the Context Kit **does not grant any rights** to use the *Business Rules* software beyond what is permitted under the BR License Agreement.

Any implementation, system, or product that uses the Context Kit to interface with, emulate, extend, or operate BR functionality must **recognize, enforce, and comply with** the BR License Agreement, including:

- Free use for configurations up to **four (4) users**
- Paid licensing for configurations above **four (4) users**
- Prohibitions on reverse engineering, decompilation, or functional duplication of BR
- Prohibitions on creating derivative works intended to replicate BR’s core functionality

4. Restrictions The Context Kit itself may be freely used, but Licensee **may not**:

- Use the Context Kit to circumvent BR licensing limits or user-count restrictions
- Use the Context Kit to create systems whose primary purpose is to replace, clone, or substantially duplicate BR
- Misrepresent BR licensing terms or remove references to required compliance

5. Intellectual Property The Context Kit and all BR definitions contained within it remain the intellectual property of the Licensor. This license does not transfer ownership of any BR software, specifications, or related materials.

6. Redistribution Licensee may redistribute the Context Kit, provided that:

- This license text is included in full
- The BR License Agreement is referenced and included
- No modifications remove or weaken the requirement to honor BR licensing terms

7. Warranty & Liability The Context Kit is provided “as-is,” without warranty of any kind. The Licensor is not liable for any damages arising from use of the Context Kit or any systems built using it.

8. Acceptance By using or distributing the Context Kit, Licensee agrees to all terms of this License Agreement.
